3-Point Control Lever

The ergonomic 3-point control lever has smooth motion for reduced effort and improved control. A rear, external 3-point control lever allows the operator to control the 3-point for easier attachments of implements.

4WD Engagement

4WD comes standard on all models and is engaged with an easy access lever.

Rear Differential Lock

The differential lock lever allows for easy engagement/disengagement of the differential allowing you to maintain traction on uneven or muddy terrain.

Tail Lamp & Flasher

The stylish tail lights improves operator safety by increasing visibility. When the lights are on, the fender-mounted flasher alerts traffic to your presence when travelling on the road.

Single Lever Joystick

Front-end loader work is made easier by the use of a single lever joystick. The lever returns to neutral when released. A float position allows the bucket free flotation over the ground surface.

Illuminated Dashboard

The illuminated dashboard ensures great visibility while working in bright daylight or at night.

Controls

Standard Single Lever Joystick and Dual HST Pedals are conveniently located for optimum operator comfort.

Eco-Friendly Engine

Daedong diesel engine produces low noise, little vibration and meets or exceeds EPA regulations.

Power Steering

The standard power steering minimizes the effort required to make tight, repetitive turns.

Dual HST Pedals

HST models employ a two pedal system for forward and reverse with smooth engagement, acceleration and deceleration. Pedal pressure is minimized which reduces operator fatigue during long hours of use and when doing repetitive tasks.

Powerful HST Transmission

HST models feature performance-proven, heavy duty HST drives that deliver power and efficiency. The three range transmission (Hi/ Mid/ Low) with twin pedal operation makes your job easier, smoother and safer.

9x3 Manual Transmission

Manual transmission models feature 9 Forward and 3 Reverse speeds delivering heavy duty performance. Second and Reverse gears are synchronized for efficient forward and reverse operations requiring frequent shifting.

Center Marker

The center ridge marker on the hood assists with maintaining straight rows.

High Ground Clearance

The maximum ground clearance of 13.4 in. makes usage on rocky or uneven terrain simpler.
