GOING STRONG IN AUSTRALIA FOR OVER 18 YEARS

MEET THE FAMILY

run ahead of the pack

run ahead of the pack

CS2610

26hp

The best value tractor for small acreage also delivers nifty versatility where it's needed on larger farms.

Whether it's for mowing, digging holes, grading driveways or moving materials with the standard 4-in-1 loader, this subcompact tractor will reliably save hours of labour and is very easy to use.

The workstation is ergonomically designed for comfort and safety. Controls are perfectly located and the seat is adjustable. The high impact flat polymer operator platform reduces vibration and it's easy to clean. There's plenty of room to get on and off, and no obstructions.

Modern design and a 26hp Shibaura diesel engine make it highly economical to run and maintain. Access for daily checkovers is simple with a one piece bonnet, while the front mounted radiator ensures good airflow with a maintenance screen.

Operating the twin pedal side-by-side HST foot control feels easy and natural, delivering quick, smooth forward and reverse motion. With very responsive power steering and standard industrial tyres, the CS2610 tractor feels great to drive on flat or undulating terrain.

SO HOW DOES THE CS2610 COMPARE WITH THE REST?

SERVICE

CS2610

FEATURES

- Twin HST pedals

BENEFITS

- Easy forward and reverse movement
- Smooth engagement, acceleration and deceleration
- Minimised pedal pressure
- Reduces operator fatigue during long hours of use

FEATURES

- HI-LO range lever
- Rear PTO and mid PTO

BENEFITS

- Adjusts transmission speeds to suit all applications
- Controlled separately or together with a simple in-line shifting lever

FEATURES

- 26hp diesel engine

BENEFITS

- Large power output
- Low fuel consumption
- Fluid service and inspection locations easily accessible to the operator

FEATURES

- One piece bonnet
- Easy access to battery
- Front mounted radiator

BENEFITS

- Convenient access for daily check-over
- No obstruction to battery location
- Better airflow with maintenance screen

CK3010

30hp

For a best performing small tractor, take a good look at the 30hp CK3010 with its 3 cylinder Kioti diesel engine, heavy duty front axle and

This solidly built tractor with standard loader and 4-in-1 bucket is well designed for loader use and a great performer with a whole range of implements.

Real versatility calls for power to the hydraulics and the CK3010 also has the weight and stability to comfortably handle plenty of big jobs, all your general maintenance and day to day work around the property.

With independent PTO, standard hydraulic rear remote to suit a range of rear mounted implements, 4WD, power steering, and standard industrial tyres, it's more than a match for rugged work on small acreage, such as mowing, slashing, trenching, digging, fencing, grading, clean-ups and moving materials.

Teamed with the robust quick attach/detach backhoe with dedicated operator seat, it has the kind of versatility and reliability that makes it a favourite with small contractors too.

Practical ergonomic design and features such as the integrated hydraulic joystick control and hydrostatic transmission with cruise control, make the CK3010 not only easy but a real pleasure to operate.

SO HOW DOES THE CK3010 COMPARE WITH THE REST?

SOUTH KOREA'S FINEST TRACTORS DESIGNED FOR *Australian Farmers*

CK3710 & CK4210

37-42hp

run ahead of the pack

Definitely our most popular tractor for small to medium acreage, thanks to great Kioti value and unbeatable specs.

Available in several configurations with transmissions to suit different requirements, this CK line up includes ROPS models CK3710 (37hp), CK4210 (42hp) and the CK4220 air-conditioned cabin tractor, perfect for spraying, allergy avoidance and keeping the weather out. All have fuel efficient Kioti liquid-cooled diesel engines, eco-friendly and designed to lower noise and vibration. Practically designed for safety and comfort, they have a deluxe seat, operator weight adjustment, suspension system, flat operator platform and generous entry and exit areas. Choose from efficient manual transmissions with 9 forward and 3 reverse speeds, or standard 3-range HST transmissions with convenient twin pedal foot control. The HST link pedal acts as an automatic throttle with the operator's transmission input. HST models also have cruise control and heavy duty HST drives for smooth, powerful operation.

Cast iron transmission and axle housing deliver strength and stability, and high ground clearance makes work easier on rocky or uneven ground. These tractors are built to work and built to last. They are easy to operate with ergonomically placed controls, easy to store due to their compact size, and extremely easy to manoeuvre with 4WD, hydraulic power steering, standard integrated hydraulic joystick, independent oil-immersed brakes and rear differential lock.

High performing hydraulics, a standard loader with 4-in-1 bucket, 2 sets of standard rear remotes, standard rear 540rpm PTO, standard industrial tyres and optional backhoe plus a range of 3-point linkage attachments make these models real all-rounders.

SO HOW DOES THE CK3710 COMPARE WITH THE REST?

SOUTH KOREA'S FINEST TRACTORS DESIGNED FOR *Australian Farmers*

DK SERIES

run ahead of the pack

48-58hp

The DK Series offers more standard features, more reliability, more value, more strength and more all-round usefulness – in other words, more of

Teamed with a standard loader with 4-in-1 bucket and a precision backhoe, the DK is so versatile, some owners wonder how they ever managed without it.

Take on board the very comfortable well-planned design, low steering wheel, compact dimensions with foldable ROPS, and generous step-through platform. The smooth 8 forward/8 reverse synchro shuttle (DK5310 hydrostatic transmission) is well engineered to take the stress out of repetitive front end loader work. An efficient liquid-cooled 4-cylinder Kioti diesel engine with outstanding torque reduces noise and vibration and also keeps running costs down.

The DK gives excellent maneuverability and easy, convenient operation with 4WD, hydrostatic power steering, wet disc brakes, standard hydraulic remotes, standard hydraulic independent 2-speed PTO and a one-touch control lever to easily lift or lower implements.

With its high ground speed, high lift capacity and impressive hydraulic pump flow of more than 55 l/min, DK tractors are well suited to a broad range of farming needs on properties of all sizes.

SO HOW DOES THE **DK5310** COMPARE WITH THE REST?

SOUTH KOREA'S FINEST TRACTORS DESIGNED FOR *Australian Farmers*

NX SERIES

60hp

run ahead of the pack

Sturdy and strong, easy to use and very comfortable, the NX workhorse reliably powers through a wide range of jobs day in and day out.

The eco-friendly Kioti diesel engine delivers powerful performance and optimal fuel efficiency while significantly reducing noise levels and vibration.

Hydrostatic power steering minimises effort and the steering wheel and deluxe suspension seat can be easily adjusted to suit the operator. The ergonomically designed cabin has heating, air-conditioning and excellent visibility. High projection headlamps and working lamps provide safer, easier operation in dark conditions. True cruise control allows the operator's hands to remain free for steering and implement control while the tractor maintains a set speed regardless of ground or load conditions.

The performance-proven heavy duty drive and 3-speed transmission (Hi/Mid/Low) with twin pedal operation give smooth and easy power delivery. The hydrostatic link pedal synchronises the HST pedal and engine rpm, which further improves fuel economy and ease of use.

The NX series has so many features to make work more productive and enjoyable. A standard front end loader with 4-in-1 bucket and a precision backhoe bring even more operations within the scope of this popular versatile utility tractor.

RX SERIES

run ahead of the pack

60-80hp

Have confidence in the right choice of tractor with Kioti's hardworking, durable and fuel efficient RX series 60-80hp ROPS and cabin models.

These high quality RX utility models with Kioti diesel engines, powerful hydraulics, large fuel tanks and impressive 3-point linkage lift capacity also have many standard features, increasing the value without extra expense.

Heavily built with plenty of power for a diverse range of operations such as spraying, ploughing, fertilising, slashing, sowing, loading, general clear ups and pasture maintenance, the RX series comes with standard 4-in-1 loader, standard 2-speed PTO and standard 2 sets hydraulic rear remotes.

The 24 x 24 transmission with creeper provides the perfect speed for every job. Standard wet clutch with hydraulic forward/reverse shuttle and the standard electric de-clutch button make driving easy with no clutch pedal needed to change gear. A one-push switch activates hydraulic 4WD on-the-go.

Truly comfortable ergonomic design puts pleasure back into long working hours. Simple operation, control at your fingertips, easy manoeuvrability with a good turning circle, and 360 degree visibility for safer loader work are features that contribute all day every day to the sense of a good job well done.

SOUTH KOREA'S FINEST TRACTORS DESIGNED FOR *Australian Farmers*

PX SERIES

95-105hp

run ahead of the pack

A great tractor is easy to use, comfortable, responsive, economical and reliable with plenty of power.

Meet Kioti's PX Series - all the features that make a great tractor and so many of them are standard. From 95-105hp, powered by trusted Perkins low vibration four-cylinder diesel engines, these models are a pleasure to operate, with excellent fuel efficiency, powerful hydraulics and a good sized fuel tank.

The air-conditioned/heated cabin is quiet, roomy and comfortable with a flat obstruction-free platform, well planned ergonomic comforts and excellent visibility through wide windshields. Whether they are used for repetitive loader work, slashing, spraying, pasture maintenance or hay work, including loading big square bales, tough frames and well engineered design make all the difference. Features such as integrated joystick loader control, push button transition from 2WD to 4WD, and an impressive 2400kg 3-point linkage lift capacity make work easier, safer and far more productive.

With a standard wet clutch and smooth efficient 32 forward/32 reverse Powershuttle transmission, standard electric de-clutch button and hydraulic Hi/Lo splitter, standard 4-in-1 loader and standard 2-speed PTO with 540/1000rpm plus auto stop, the PX tractor is a top performer delivering real value for money.

UTV's

22-24hp

The ultimate utility vehicle.

It's no secret how useful the 22-24hp Kioti Mechron is.

Versatile, tough and highly manoeuvrable with many safety features, it has a well earned reputation as the ultimate utility vehicle for work or play. A flat operator platform and generous bench seat with three seat belts can comfortably accommodate three people, further protected by a strong tubular steel ROPS frame and optional sun canopy.

Power up for acceleration, towing or driving on undulating terrain with standard power steering, two-range CVT transmission, four-wheel-drive and proven Daedong diesel engines, with the added benefits of lower running costs and easy maintenance. Factor in the impressive payload capacity, the standard hydraulic tip tray, and the widest cargo bed in its class, and it's easy to understand the Mechron's widespread popularity. The 2230 model has an extended wheelbase and cargo tray for even more utility.

Front independent MacPherson struts and adjustable rear suspension give the smoothest possible ride even under load. Long lasting front and rear hydraulic disc brakes, rear diff lock and high ground clearance help to ensure safety and control.

The new 24hp K9 model offers an improved digital dashboard with ergonomic control layout, tilt steering, standard half doors to increase occupant safety, and up to 50km/h road speed. The Mechron is the perfect utility choice for a wide range of applications and circumstances including farms of all sizes, orchards, vineyards, lifestyle blocks, horticulture operations, environmental and construction situations, and grounds maintenance.
